INTRODUCTION

In the context of the ERASMUS+ project entitled Preventing School-Based Bullying by Creating Early Prevention Programme (PRoToTYPe), a multiplier event was organised at the school canteen of Wojska Polskiego High School, Poland on the 24th of April, 2024. The event was organised in the form of a local conference and the workshops opened to the general public, with emphasis on the participation of psychologists, pedagogists and teachers from the city and the county. Local authorities, research and counselling unit members and other key persons from the local and regional educational organisations were invited to take part in the conference.

The main objective of this multiplier event was to promote the project PRoToTYPe and present its main outputs. According to the project proposal, an attendance of at least 30 participants was expected for the multiplier event.

Organisers

The event was organised by the project coordinators, Marzena Kisiel and Agnieszka Kowalska, with constant support and assistance from the school headmaster Mrs. Teresa Popielak, who supported the project team in all aspects of the project implementation. Mrs. Teresa Popielak participated actively in the Multiplier Event, she welcomed all the participants and made a speech on the Prototype outcomes and the project review.

Preparations

Prior to the event, an application process was initiated using a Google form to collect participation requests from interested individuals in schools. The school project team prepared the list of the potential participants, prepared the invitations and sent them to all groups of interest. The schools and other organisations were officially notified through an official letter about the event. The project team organised all guidance materials and documents essential to conduct the event. The conference room - a school canteen was arranged to the needs of the conference. Due to the event's duration, which spanned across two sessions, attendees were provided with a coffee break. In total, 33 teachers actively participated in the dissemination event. The school coordinators of the project made the prior preparations concerning the Multiplier Event such as: preparing the conference materials and documents, writing a project agenda, making presentations, adjusting the school canteen to the conference needs, preparing the coffee break, designing and printing the conference materials

Event Overview

The dissemination event consisted of comprehensive presentations on the Prototype project and its results. The information related to the project was shared with a detailed examination of each intellectual output, followed by practical applications. Additionally, participants explored the prevention plan created on the Genially platform for the Prototype project and the gamification output, and teachers were encouraged to enrol in the available courses. The participants were

familiar with the project results and the data gathered. The Risk Analysis (01) and Factor and Need Analysis (02) were presented during the event and briefly discussed. The Bullying Prevention Programme (03) was presented in the form of an interactive portal, which was actively used by all the participants. The last project result - Game (04) was at first introduced by the school coordinators and in the next stage the participants could use the games in practice and provide their feedback.

Session Structure

The dissemination event was divided into two sessions: part 1 (09:30-11:00) and part 2 (11:00-13:00). In two parts of the Multiplier Event, 33 participants in total took part in the event and they were actively engaged in the dissemination event.

Conclusion

The Prototype project dissemination event was successfully conducted under the supervision of the school headmaster Mrs Teresa Popielak and school project coordinators: Mrs Marzena Kisiel and Agnieszka Kowalska. The event provided the participants with valuable insights into the project's intellectual outputs, along with practical applications. The event's sessions attracted the participation of 33 participants, facilitating meaningful discussions and knowledge exchange among the attendees.

AGENDA

9.30 – 9.45: registration of participants
9.45 - 10.00 - ceremonial opening of the event by the director of the Polish Army Secondary School - Mrs. Teresa Popielak and the coordinators - Mrs. Agnieszka Kowalska and Mrs. Marzena Kisiel
10.00 – 10.45 – presentation of the assumptions and achievements implemented as part of the project "Preventing bullying at school by creating an early prevention program" and the results of intellectual work
10.45-11.00 – question and answer session
11.00-11.30 – coffee break
11.30 – 12.30 – workshops using computer games and school preventive program
12.30 – 13.00 – summary of the conference and distribution of certificates

Morning Session (part 1)

Co-funded by
the European Union

09:30-09:45: The first stage of the conference was a ceremonial opening of the event by the director of the Polish Army Secondary School Mrs. Teresa Popielak and the coordinators: Mrs. Agnieszka Kowalska and Mrs. Marzena Kisiel

The morning session began with a presentation of the assumptions and achievements implemented as a part of the project "Preventing bullying at school by creating an early prevention program" and the results of intellectual work. The lecture on the final project results provided an in-depth review of the Prototype project. The project coordinators discussed the project's goals, objectives, and the pedagogies of the Prototype project. After the presentations, the participants took part in a question and answer session.

Afternoon Session (part 2)

The second part of the Multiplier Event started with a practical usage of the Prototype computer games and school preventive programme. During the workshops, the participants had an opportunity to use the final outcomes in practice and discuss all potential questions connected with the final project results. The attendees also worked on the bullying surveys and could express their opinion on the event filling in the evaluation questionnaires providing feedback for the organisers.

The afternoon session concluded with a certification ceremony, recognizing the active participation and engagement of the attendees throughout the dissemination event.

The carefully structured agenda ensured that participants gained comprehensive knowledge of the project, project results, and anti-bullying prevention plan, games allowing for a productive and enriching experience.
